huschi.net: Ten little UNIX lines

Ten little UNIX lines,

were going to the law

the Grecian line was for the birds

as everybody saw.

Nine little UNIX lines,

presented at the court,

one was not found in LINUX code,

in spite of great effort.

Eight little UNIX lines

the trueness for to see,

one of them instead of this

belonged to BSD.

Seven little UNIX lines,

but one did not cumcumber,

apparently to everyone

it was an error number

Six little UNIX lines,

should support the claim

one GPLed by SCO

could not achieve the aim.

Five little UNIX lines,

as piece of evidence,

the one of former System III

was inapplicable, hence.

Four little UNIX lines,

good tale to be told twice

wasn't code but just comment

bad luck for Mr. Heise

Three little UNIX lines

so sorry, one of them,

was programmed for AIX

and owned by IBM.

Two little UNIX lines

McBride in seventh heaven,

but great letdown: one came from tape

labelled Version Seven.

One little UNIX line,

was not a plus, but minus,

it eaysily was clarified

that's code of good old Linus.

Without any UNIX line,

none left on McBride's behalf,

but everyone have to admit

we had a lot of laugh.

Final remark:

A nursery rhyme shows obviously,

that McBride acts untruthfully.
